HEAVIEST STORM

(Continued From Page One.) were entirely wifed out by the ava-

Automobiles Stuck in Mud.

Hundreds of Sunday pleasure seekers n automobiles, carriages horseback and walking were caught unawares by the storm and last night scores of marooned cars were seen in Colorado night City and Manitou. How many were in the mountains and stalled on the part of the evening Little trouble was water-swept roads cannot be estimated, but it is certain that a number spent the night bivouscked around their machines or walked to town for

were drenched. The suddenness of the storm caught many unawares, and the light, midsummer wearing apparel was poor protection for the cold, beating rain that fell in sheets

Street car service was demoralized during the storm. The rush of water carried debris of every description over the tracks, covering them in many sections and preventing the operation of cars. The company soon had wrecking care out but there was no service to Manitou for several hours.

Street cars proved havens of refuge for hundreds of people but the crossings were torrents several feet deep and many not wishing to attempt the water, stayed on the cars until the frood subsided.

Rainfall Fall Nearly Two Inch Up to 16 o'clock last night, the Colorado college wither bureau reported 1.78 inches of rain, and all but about one twentieth of an inch of this amount fell after 6:30 o'clock.

The greatest intensity of the storm was confined to the west part of town. While the Santa Fe and Colorado & Southern railroads had little or no with sand aventile over its tracks in number of bruises. The engine was effective is the offset of the abundant of train No. 2 at Reiker for some time Train No. 8, southbound, later was held at Pke View, and train No. 10. nbrthbound, was held at this city because of trouble at the Mosa road crossing. There the water, flooding TWO AMERICANS MAY down from the hills to the west, stood at times a foot deep over the rails. and trains were held for reasons of surety. The Denver & Rio Grande yards were flooded, and under the Huerlano street viaduct the water flowing between the tracks practically formed a creek. In the part of the 'ards where a slight wreck occurred earlier in the evening, the water covered the rails. At 6 o'clock an express car attached to a train for Manitou broke loose and rolled back into the yards. It coilided with an engine, but there was little dimage.

Sought Shelter Under Cars.

The storm broke soon after the coiision, when there were crowds of passengers and spectators around Many sought refuse in sheds, others crawled under em; to passenger coaches and others entered the partly wrecked express car. Men under the coaches were soon driven out by the intuablic water

The flood coming down from the aills to the west threatened its greatest damage along North Spruce, Pine. Walnut and Chestnut streets and in the neighboring districts. The water in some places there ran three feet deep in the streets, and the police automobile on its way to rescue various people from their homes, was in one case una vo to reach its destination

The poli e were forced to do their work of rescue so quickly that they had no time even to get the names of the people whom they helped From one house near the intersection of Pine and Monument streets, they took a woman a month-old haby and two smail children. The woman had only recently returned from a hospital From an t.er house in the same block they rescued a woman, a baby and a small hild. They were token to a house on I as! Monument street

American Adding Machine

The Latest Ådder

Costs But \$35 See our 'exhibit--Ask for

10 days' trial Here is a new price on a comretent Adder On a machine that

is rapid, full-size and infallible. The very latest machine, built by men who know, in one of the largest metal-working shops It is an individual Adder, to be placed on one's desk, close to one's books and papers. To take the place of the central machine requiring skilled operators.

It is also intended for offices and stores where costly machines are a luxury.

The price is due to utter simplicity, and to our enormous output Seven keys do all the work. Fech copied number is shown up for check-

ing before the addition is made. The machine will add, subtract and multiply. With very slight practice anyone can compute a hundred figures a minute. And the machine never makes mistakes.

Countless offices, large and small, are getting from these machines the highest class of service.

Non we make this offer so that offices everywhere may learn what this machine means to

Ten Days' Test

We will gladly place in any office one American Adder for a ten days' test

There will be no obligation, and charges will be prepaid

Compare it with any non-lister even the costliest. Let anyone use it. See if any machine can serve better than this -Just send us this coupon and e'll send the machine.

The Out West Printing & Staty. Co., 9-11 E. Pikes Peak Ave. Colorado Springs, Colo. Please send us an American Adding Machine for ten days' free trial; "Street Address

FINANCIAL REVIEW

NEW YORK, Aug. 10.—The notable cature of the week's stock market has been the manner in which the advance in prices persisted in the face of un-favorable factors. Breculative senti-ment evidently held the balance of infinence to be in favor of values.

The most serious matter the market had to contend with was the demage to the corn crop. Even the government report Friday was held not to cover-the full amount of harm from the During awitching operations, an drought, which went on after the date empty Denver and Rio Grande express of the report. The indifference shown was due partly to knowledge of the large resolve of corn from last year's crop. This fact did not the Atlanta in corn to the season's highest, thus and crashed into a Colorado Midland trouble with their tracks. Denver & engine in the Denver and Rio Grande affording another offset to the farmis notably included, owing to the de-Rio Grande trains were tied up for wards. No one was seriously injuged, ers loss from double delineral as of the farming read had trouble sethough Charles Piping sustained a in fact, and higher than wheat in many ity, for government depoytes, the south part of town, which delays! removed impediately after the water wheat yield. Endumous market up of train No. 10 and caused the holding dent. Wracking clews worked on the grain bare further feathway to conform No. 2 at Refer for some time express car, but had not succeeded in fidence in the supplies. This was a removing the wreckage up to a late rotent factor in building up railroad traffic (which made July gross earnings a record on western railroads) in liquidating grain bills at the banks and in sustaining the volume of export

trade.
While the prevailing stock market mood was one of indifference to the corn crop news, commercial advices indicated indicated. GET NOTFD FRENCH HONORS that merchants were paying more at-Beach, have been made chavaliers of

tention to the matter.

the speculation against the fear of large addition to stores of relined cop-per for the preceding month.

per for the preceding month.

Undoubtedly the prevailing hopeful spirit comes from larger canna at work in all markets. Money conditions become easier everywhere. The Briken pages if the was twen as the result task of financial insconstruction is to be fored. Return of confidence, however, is expected to raising himself in receiving timely assistance by receiving timely assistance by receiping of gold from South America.

Feteiningtion of the sacretary of the Determination of the sacretary of the

treasury to deposit surplus funds in buthern and western banks billies increveel offers to lend in the money market. Demand for mercentile raper is notably inc. avead, owing to the de-

COSTLY SMOKE

SIX hundred million dollars a year is the cost of the smoke nuisance in this country, as estimated by Chief Engineer Wilson of the experiment station of the United States Bureau of Mines at Pittsburg. This sum, he says, "would build in every city of 100,000 inhabitants in this country a structure equal to the Congressional Library, considered the most beautiful building in the world. There would be left over enough to maintain the Army and Navy for the current year, and then plenty left, after that, to build the Capitol at Washington."

Other authorities support these figures. The Iron Age has made a careful investigation, and finds that in Cleveland the anmust loss caused by smoke is \$6,000,000; in Cincionati, 18,000,000; in Pittsburg, \$10,000,000, and in Chicago \$17,000,000. These figures represent mouths of careful . Alk by whole experts and college proresous delegated by those cities to study

Covernament experts declare that smoke self a make of through bring and count without strates any sight post William 31/2 is self in the self of t Manay of Licumothe Englishers:

lotten firemen in a run of two hours The Market of the last strate with the law can in the year time rand at a state mound no shoke.

in countries with most cities, even no larger than this, Colorado Springs suffers little from the smoke missince; nevertheless there is more of it here than is either necessary or 1 rable. The railroads of course, are the worst offenders, as can easily he seen by an observer stationed on the high ground near the Printers Hone, on the Mess or at Broadmoor. From such a vantage point the whole city appears overhung with a pall of smoke.

To a newcomer the air in Colorado Springs seams, and in fact is, wonderfully pure in comparison with the air of other cities, but when one gets out on the plains or in the foothills the difference is apparent. It is a question which the Council ought to consider seriously with a view to the adoption of some effective means of lessening the evil. It has been done elsewhere, and it can be done here. The reputation of Colorado Springs for the purity of its atmosphere is too valuable an asser to be endangered.

TOO MANY EXPOSITIONS

THESE are discouraging days for the San Francisco exposition promoters. Great Britain and Germany have declined to take part in the big show, and Russia and Austria-Hungary have indicated that they probably will do likewise, the latter on the ground that it would cost too much to make representation "commensurate with the dignity of the empire." Only France and Japan have accepted.

All of which is not especially surprising. The exposition business is overdone; it was overdone years ago, long before the San-Francisco show was thought of. Congress. willingly voted money for the Centennial at Philadelphia in 1876 because it was the first show of the kind in this country. It displayed less enthusiasm when Chicago asked for a few millions for its fair in 1893. and it gave money to Buffalo for the Pan-American Exposition with marked reluctance. St. Louis had to plead hard for government aid for its big fair in 1903, and the feeling in Congress against further financial aid of such enterprises was so strong that it was supposed the next applicant would be turned away empty-handed. But somehow San Francisco managed to connect with the Federal Treasury in the usual fashion.

It costs several millions for one of the first class nations of Europe to make an appropriate exhibit at an American world's fair, and the returns certainly do not justify the expenditure. From first to last our own Government has spent more than \$50,000,000 financing them, and aith-ugh the money has undoubtedly helped to make them successful, the propriety of granting it. is at least questionable. For the truth is that a world's fair is usually launched chiefly to boom the ambitious city that promotes it, and this being the case the city ought to pay the bill.

"PERPETUAL" MOTION

ABOUT twenty years ago a man named Keeley claimed to have invented a motor which would run forever without renewal of power in other words, he had discovered the secret of "perpetual motion." The machine was exhibited with an air of mystery to prospective investors, and Keeley made considerable money selling stock, for the model actually worked without any visible power. Then keeley died, and an examination of the machine showed that it was run by compressed air, supplied through a tiny tube from an adjoining room.

More recently an inventor named Tripler thought he had discovered the secret of perpetual motion by utilizing liquid air. He built an engine which theoretically would produce ten pounds of liquid air at an expenditure of only three for fuel purposes, but it didn't work in actual practice.

Now comes an Italian inventor with another perpetual motion device, thus described in the dispatch:

The basic principle underlying the method employed is the contraction and expansion of gas. The machine collects the caloric energy of the air, which is inexhaustible, and tran forms it into mechanical energy. The air is supplied automatically and the apparatus is in continuous motion by reason of the pas vee of the gas how the warmer atmosphere to the colder water.

But unfortunately for the "discoverer" of perpetual motion, the laws of physics still stand, although the device may continue for a long time to be useful in conjuring money from the pockets of credulous investors.

CURN AND WHEAT

THE geatler-on employed by the Aprilin set att to eas to least up of the crops before they are here of the say they the Joly at side thre sut for Cities of pleted by the corol note the best free because it is a real part of 2.682,000,000 free to or 452,000,000 bashe't lass i'm fart shar's Diedval's V

Corn is king, and there is sent compensation to the farmer in a targe vield of other or grains if his corn crop falls short. The blists ing hot winess of the bet mouth by t diled up faths and streams, reducts the water supply of to ins; and inflicted endless. discomfort and no little suffering on the scople of the Middle West. But even more serious is the destruction of wealth incident to the partial min of the corn crop. A few days ago a report from Chicago asserted that the loss caused by the drouth in one week amounted to no less than \$125,000,-000, or nearly as much as the loss caused by the Chicago fire forty years ago.

But the cloud has a silver lining, for the production of winter wheat promises to be the largest ever known, exceeding the recand crop of 1902 by ten million bushels. The spring wheat crop is also above the average, so the farmer probably will continue to buy automobiles as of yore. It will take more than one crop failure to bring back the days of the mortgage on the farm.

From the Philadelphia Inquirer,

A strike in the silk mills of Paterson, New Jersey, which has been going on for months, has ended in a dismal failure. It was doomed from the start, for the very good reason that it was the work of blood sucking leaders of that aboutinable organization known as the industrial Workers of the World, These leaders toll not, neither do they spin. They work only with their venomous tongues. They live and live well-by fomenting strife. While the poor wetlins of their greed are starving or languishing in fall because of the furbulence to which they have been driven by these leaders, the latter wear good clothes and feed upon the best that the markets

It is to the credit of the American workingman that the field of the I. W. W. activities is largely limited to the more ignorant of the foreign element. The American workingman is intelligent and he can i not be led into a movement that has for its object not the bettering of conditions which exist between employer and employe, but the actual bankruptcy and seizure of all industrial plants by the men who work in them. The one idea of the Industrial Workers of the World is confiscation, and their plan for arriving at the confiscation point is the fomentating of the size of the dose of strike after strike in the same factory with the

avowed object of rendering production unprofitable. The strike in Paterson has cost scores and bondreds of thousands of dollars chases that year tern mivided between the employer and the employe. Scanty savings have been swept away. Abject poverty has resulted. Men and women have lived as nest they could from band to mouth and children have been on the verge of starvation. And now if is all over and no one has profited save the blathers. kite and blood-sucking leaders.

They, have profited. And now, having pumpal Paterson dry they will muse on the me other place.

IHP HAN AND THE TIP. T From the New York Iribune.

Though it is a we blow to civic pride, it must be acknowledged that St. Louis has scored over this fixe. It may be all right for a wetter to upheld clacdistinctions, hidebound conservation and all the good of ine aristomatic notions by knocking down a prospective pairon who desired sauce Tartare with his crabs, as one of this city's finest did. But the action of the St. Louis walters in Raving passed by the city council a no-tipping ordinance is an appeal to the Dure democracy-rule-of-the-people spirit which to be the dominant and irresistible thing these days. As such it must stand in the front rank in the march of progress.

May the good work so on! May it spread to other cities and other occupations. After all there doesn't appear to be any good reason why the envployer, instead of the customer, should not pay waiters and porters and boothlocks and barbers, and the manifold other Knights of the Outstretched Parm. it may be too much to expect to see it in. this generation. But there are signs such as this which give cause for hope.

The Suffragelle

There are many reasons why America is mo greatly blessed than Bugiand. She does not have English fords, bath tube or weather. She does not have to live up to English history. She doesn't have suffragettes

The suffragette is indigenous to the English soil. She is a product of the me culine state of mind in Bagland, which does not charge without the avitetance of blasting powder.

Better Be Sui s Then Sorry

BY RUTH CAMERON

KA 1 T F

A few weeks ago a two year old boy, whose se sition at the giandson of St. Gaudens, the famous sculptor, made him a figure in the world's news, got his hands on some strychnine pills and swallowed one. It was so large that it stuck in his throat, but the haby traveled over to a table and actually managed to clutch a glass of water in life fittle hands and wash the pill down. He died in convulsions before anything could be done.

I suppose some millions of mothers shuddered as they read that story and promised themselves that no such thing should ever happen to their habies. And yet it will. Into some of those very homes make him want to know more about

the United States with inadequate saulpment and support, attempting to sive full courses for the a chelor's de-Will that much duplination of work is going on; and that there could be a profitable merging of existing lastitutions to the resultant benefit of the institutions and the community; these are inferences that may be clearly drawn from the report of Dr. R. C maccook, in the yearbook of the com-

missioner of education, just issued.

The problem is pacticularly acute at this time in the case of state-supported institutions. Many of the states have their work of higher education contralized in the state university or agricultural college; but in nine states there are three or more state-supported and state-controlled institutions. It is in these states, particularly, that conditions are often found under which "the distribution and subdivision of what should be a unified function of the state as a whole has led inevitably to waste, duplication. undesirable competition for appropriations, and campaigning for students in order to get more appropriations." The report concedes that in some

states circumstances demand that the institutions, be distributed in accordance with special needs. Thus there is on obvious advantage in the location of the Michigan, College of Mines and the Missouri School of Mines in the mining districts of those states. Fur then fore, Dr. Babcock frankly states that the waste due to duplication of faculty, equipment and buildings is frequently overestimated. "There is no loss of economy or of efficiency!! he ways, "in carrying on in different places the work of the first year, or the first two years, of a liberal arts course or of a course preliminary to tichnological work, provided the faculty and equipment of these two years are fully utilized.

"It is when specialized and technological work is begun in the second or third year of the usual course, when the services of high-saturded men and supplement expensive equipment are required, that the waste and ineffl-Con illerable effort hes accently been

hat appraidly the he the me'n raliance of industriel traffing in Girmany, and that it might be d' limble to revive it in some force in this course to, it the conclusion of Dr. Helmes Beckwith, who has propered for the Then after a while the time came United States bureau of education a

> and its lessons for the United States. "Wasteful though the old apprenticeboth in German; and the United States, has in it much of promise for the fuwhere they are employed and by those who supervise their work,"

Dr. Beckwith suggests that if all employers pay the cost of adequate training for any youthful workers whom they may employ as apprentices, the burden will not be serious. He points to instances both here and abroad to prove that "firms employing bonande apprentices today find that their apprenticeship system pays." Revival, of apprenticeship alone will

not solve the problem, however, "What a we should atrive for," declares Dr. Beckwith, "is such broadening industrial training as will supplement the narrower range of skill and knowle edge, and give the specialized worker Specialization is Probably more widespread in the United States than in Germany, and this constitutes an added need which we have for industrial education greater than that in Germany.

"Industrial schools, then, we must have, and in far greater numbers ig : meet the needs of far more, workers than at present. Otherwise we can nake little claim to really popular education of the sort closest to the worker's activities.

Dr. Beckwith notes the present awakened interest in industrial education in composed of Republicans, Independents the United States, but issues a word and Independent Democrats, to head of eaution. Philadelphys, Athlerace, leaders, respecitiely, in the National and Amerileague, and whicego and Boston in the counger were the six that sticceeded

In the National league, the week's esults continue to show that Manager McCraw of New York cannot ver be certain of driving his team through the 1913 series, for Philadelphia in seven days cut the Gianta' 83 roint lead down to \$4 points, representing a game. and a half. The Globis gained a half. game today by defeating Cincinnati while Philadelphia was lide.

On the other hand, in the American circuit, it would appear that 4 8pmis Mack, although his team lost 10 points in the percentage table, can begin games. for his club is farther ahead of the field than it was last Runday due to the Seguitive showing of the runnersup, Cleveland and Washington.

The Carelands just about eliminated them Wis Was Nam routenders this year. In the speek's contests with Philadelphia, Rirmingham's players were outhacted and outhelded. Even in Cleveland's lone victory, the Office ans wate outhit. Mache pitchers, with the exception of Plank, twirled chemstangets ball Bhawker. Push and Printer sign the victors, the first named acting with a two-lift game.

No. A Tark apile even on the west while St. Louis, like Cleveland and involved Callahan for the White Box, Wall ton, Lon two and lost four. anting no change took place lirooklyn.

in the Lench cuvust. Seturday night found Chicago th third place instant 313 of 1 ittaburg, with St. Louis holding give way to Roger Bronnshan. Still Cinclination for more collar published. Inaklyn the cly above eight place and Philadelphia elowiy Anging afters

Phillies Going Sand.

The Phillies in fact, got within seven games of the Giants, while the latter struck a slump due in part to injulies of parers. Philadelphis dropped two in thes out of seven, defeating St. Louis four times running and Unicago once. Chicago added these victories over the Superhan to two over the Philles, Iming once to Philiphenite and once to Breaklyn.
Piti-bus four victories as against
two defeats included the aluming of her first home series from the Giants minos 1910. To the diants this Pittsburg series

was eventful in another way. Two New York pitchers had winning 460 New York pitchers had winning

THE TRUTH OR NOTHING. THE MYSTERY OF LIFE. Prof. Garland tells that life is a mys-

tery e vest; coroplicated, profound mystery. Behind us is the irrevocapaid atble past, fast fading -away, like receding waves broke upon the shorts of time. Bafore us lies the unknown and unexpected future a future so program with doubt and parplaxities future along whos: pathways are hidden pitfalls, concerted quick-ande and rugged rocks beneath treacherous waves. Misfortune seems to be the common heritage of man. There is no cla or sect that can claim exception or immunity from these dis store they are incidental or accidental to all.

THE MAN OF THE CENTURY.

ome and friend he may decome acwill, one Sam Englage, is also on the project to propose to Beatrice while ith feeling as though his mouth were full of much; Of course, he middless hings. While drying to tell her with laulable bonest of his abstant, he makes most misleading statements.

Bedirice likes him well enough to listen to the explanation which he assures her is fortheaming, when a passerby gives poor Billy's shoulder a stap. The go somewhere, and, clapping his of Billy's societs, in the boilet that only some guilty, secret could give such a furn to his manner. The teeth are nowhere to be found and, as though the change in his appearance were not saf enough already, he finds his policy of speech sorto sta impaired and he is being able to retort. During this crists Billy is finilitiver chained by the pyg-

mies; he is Samann shorn of his treates,
